SUMMARY

Fresh BS Computer Science graduate from the University of the Philippines Los Baños (2025), currently a Junior Test Automation Engineer at Billease and solo developer of **Sandalan**, a Filipino adulting and finance app live on Google Play. Three years building production web and mobile products end-to-end — from database schema to store listing. Codebreak 2.0 hackathon champion (2025) and IRRI bioinformatics thesis affiliate. Comfortable owning the full stack: Flutter, React/Next.js, Node.js, PostgreSQL/Supabase, and AI integration (RAG, Gemini, Claude).

PROFESSIONAL EXPERIENCE

Junior Test Automation Engineer

Apr 2025 – Present

Billease

- Shipped **50+ merge requests and 30,000+ lines of code** expanding automated test coverage and infrastructure for a high-scale Android consumer-fintech application.
- Engineered and maintained **CI/CD pipeline integrations** for the core regression and emergency-hotfix suites, validating every production release against high-priority test cases.
- Discovered and resolved **30+ critical, high-impact bugs** using Appium and BrowserStack, acting as the final technical gatekeeper before deployment.
- Integrated **Claude / AI** into the automation workflow to accelerate script development and complex debugging, lifting both development velocity and test accuracy.

Bioinformatics Software Developer Intern & Thesis Affiliate

Jul 2024 – May 2025

International Rice Research Institute (IRRI)

- Implemented a custom **OAuth authentication flow** for SNPseek within a Dockerized Drupal environment, hardening secure user access and external system integration.
- Designed and developed a **MERN-based SNPseek platform** using a microservices architecture, applying full-stack techniques to improve scalability, usability, and data-processing efficiency.

Full-Stack Developer (Freelance)

Aug 2024 – Oct 2024

Project-based engagement, remote

- Built a **story-based interactive game** with a 3-person team using the MERN stack, owning frontend, backend, and UI/UX through to client delivery.

SELECTED PROJECTS

Sandalan — Filipino Adulting & Finance App

Mar 2026 – Present • Live on Google Play

Flutter, Dart, Riverpod, Drift (SQLite), Supabase, PostgreSQL, OCR, RAG

- Solo-developed and shipped a **15,000+ line Flutter mobile app** on Google Play, featuring 13 synced database tables, 38+ bank integrations, government tax and contribution calculators, OCR receipt scanning, a Taglish AI chat assistant, and Google Play Billing.
- Architected an **offline-first sync engine** with conflict resolution, incremental replication, retry / failure recovery, and row-level security across PostgreSQL (Supabase) and local SQLite (Drift).

- Designed and shipped six life-stage guides covering 1,000+ government offices (BIR, SSS, PhilHealth, Pag-IBIG, LTO, DFA, PSA); zero trackers, RA 10173 compliant.
- Links: [Google Play](#) • [exitplan-tau.vercel.app](#)

Developer Camp Manila 2026 — Voice-Driven Services Marketplace

Apr 2026 • Hackathon

Full-stack, conversational AI, speech recognition, TTS, real-time matchmaking

- Built an **all-in-one services marketplace app** with an embedded voice-driven AI assistant capable of **speech recognition, natural conversational responses, services matchmaking** between users and providers, and end-to-end automation of the business workflow.

Codebreak 2.0 — RAG-based AI Support Platform

May 2025 • Hackathon Champion

RAG, microservices, real-time APIs, full-stack

- Built a full-stack AI platform for customer-support agents featuring a RAG-based assistant that generated live call scripts from past and current tickets, plus automated post-call QA analytics.
- Owned APIs, microservices, deployment, and AI integration end-to-end, delivering an MVP in **under 24 hours** and taking 1st place against seasoned industry professionals.

IskOS — Academic OS for UPLB Students

In Development

React, TypeScript, Google Calendar API, Supabase

- Building a productivity dashboard that imports class schedules, syncs with Google Calendar, tracks absences, and computes GWA — designed for students juggling academic deadlines. [isk-os.vercel.app](#)

Ottodot — Gemini-Powered Math Practice Generator

2025 • Live

Next.js, TypeScript, Supabase, Gemini API

- Submitted as a full-stack recruitment task; generates math problems via Gemini with session history persistence. [ottodot-coding-task-full-stack-eta.vercel.app](#)

SNPseek MERN — Genetic Variant Analysis (IRRI)

2024 – 2025 • Live

React, Node.js, Express, MongoDB

- Rewrote IRRI's legacy SNPseek into a modern MERN microservices stack with advanced filtering and interactive charts. [snpseek-mern.vercel.app](#)

SOSC3 — Civic Tech Advocacy Platform

2024 • Live

React, Tailwind CSS, Vercel

- Built a social-advocacy app for community engagement and awareness campaigns during UPLB CS Society. [sosc3-advocacy-app.vercel.app](#)

PICSEL — Reservation System (Backend Developer)

Feb 2024 – Jun 2024

Node.js, Express, PostgreSQL, React

- Integrated Google authentication to harden security and streamline login.
- Contributed **9 commits and 12 merged PRs across 7 features** in a 20-developer team over 5 months.

eLBigayan — Flutter Donation Platform (Team Lead)

May 2024 – Jun 2024

Flutter, Dart, Firebase (4 services)

- Led a 2-member team through the full development cycle of a donation system; integrated four Firebase services for a secure, scalable backend.

Additional Projects

- **Fire Nation Invasion** • Unity, C# — 3-person Unity multiplayer game (up to 4 players, networked); built character abilities and core mechanics (Apr – Jun 2024).

- **MDCAS** • MERN, Tailwind — appointment scheduling, patient records, and admin dashboard for Maralit Dental Clinic. [mdcas-fe.vercel.app](#)
- **Diet Plan Calculator** • MERN, Tailwind — personalized diet planner with calorie targets and meal recommendations. [diet-plan-calculator.vercel.app](#)

EDUCATION

Bachelor of Science in Computer Science

Sep 2021 – Jul 2025

University of the Philippines Los Baños

- **Honor Roll** • Iskolar ng Laguna scholar • UP SLAS scholar
- Relevant coursework: Operating Systems (CMSC 125), Computer Networks (CMSC 137), Cybersecurity, Data Structures & Algorithms.
- Thesis affiliate with IRRI on bioinformatics tooling for genetic variant analysis.

Senior High School — STEM Strand

Sep 2019 – Jun 2021

STI College Calamba

- Graduated **With Honors**.

HONORS & AWARDS

- **Codebreak 2.0 Champion**, Tenext.ai Hackathon — 1st place, RAG-based AI customer-support platform built in under 24 hours (May 2025).
- **Honor Roll**, UPLB Department of Computer Science (multiple terms, 2021 – 2025).
- **Iskolar ng Laguna**, Provincial Government of Laguna scholarship recipient.
- **UP Student Learning Assistance System (SLAS)** scholarship recipient.
- **Graduated With Honors**, STI College Calamba (2021).

LEADERSHIP & ACTIVITIES

Code Wars Co-Head & Project Manager

Oct 2023 – Jul 2025

UPLB Computer Science Society • 41st CS Week

- Led a 7-member development team enhancing a competitive-programming event platform, overseeing feature development, bug tracking, testing, and deployment.
- Deployed and managed the live platform supporting **20 participating teams, 3 judges, and 3 continuous hours of zero-downtime service**.

TECHNICAL SKILLS

Languages	Java, C, C++, Python, JavaScript, TypeScript, Dart, SQL
Mobile	Flutter, Dart, Riverpod, Drift (SQLite), Go Router, Supabase Flutter
Frontend	React, Next.js, Tailwind CSS, shadcn/ui, Vite
Backend	Node.js, Express, Supabase, PostgreSQL, MongoDB, REST APIs
Test Automation	Appium, BrowserStack, Android E2E, regression suites, CI/CD
Infra & AI	Git, Docker, Vercel, AWS, Gemini API, Claude API, Hugging Face, Groq, Llama, RAG
Spoken	English (Fluent) • Filipino / Tagalog (Native)
