# Jet Timothy V. Cerezo

**Full-Stack Software Engineer**

jetjetcerezo@gmail.com | +63 998 914 8907 | Los Baños, Laguna, Philippines

Portfolio | LinkedIn | GitHub

## SUMMARY

Full-stack software engineer with **2+ years building and shipping production web applications** across front end and back end. Rebuilt IRRI's legacy **Java monolith** research platform into a **MERN microservices architecture** of seven Dockerized Node.js/Express services behind an API gateway. Owns features end-to-end – database schema, REST API, UI, CI/CD, release. **Available for night-shift (US hours) remote work.**

## TECHNICAL SKILLS

| | |
|---|---|
| **Languages** | JavaScript, TypeScript, Java, Python, SQL, PHP, C/C++, Dart |
| **Front End** | Flutter, FlutterFlow, React, Next.js, jQuery, HTML5, CSS3, Tailwind CSS, Vite, responsive UI/UX |
| **Back End** | Node.js, Express, Nest.js, RESTful web services, JSON, microservices, API gateway & middleware, JWT / OAuth / SSO |
| **Databases** | MySQL, MongoDB, PostgreSQL, SQLite, Supabase, schema design, query optimization |
| **DevOps** | Docker, Docker Compose, CI/CD pipelines, Git, GitHub, GitLab, Vercel, AWS, Linux & Windows |
| **Tools** | VS Code, Postman, Jira, Agile/Scrum, code review, unit & end-to-end testing, Appium, BrowserStack |
| **AI** | Claude API, Gemini API, RAG pipelines, Hugging Face, Groq, Llama |

## PROFESSIONAL EXPERIENCE

**Converge Studios Inc.** *Sep 2026 – Present*
*Software Engineer* *Remote*

- Develop and deploy cross-platform mobile and web applications leveraging **FlutterFlow** and **Flutter**, delivering scalable, cloud-first digital solutions.
- Architect custom application logic, REST API integrations, and backend workflows to accelerate development velocity and streamline business processes.
- Collaborate across cross-functional engineering teams in **Agile/Scrum** sprints to deliver enterprise-grade digital products.

**Billease** *Apr 2025 – Sep 2026*
*Junior Test Automation Engineer* *Remote*

- Consumer-fintech company serving the Philippine market at high scale; **shipped 150 merge requests and 45,000 lines of code** building automated test coverage and internal tooling.
- Engineered and maintained **CI/CD pipeline** integrations for the core regression and emergency-hotfix suites, validating every production release against high-priority test cases across **Linux** CI runners.
- Discovered and resolved **30+ critical, high-impact bugs** using Appium and BrowserStack, serving as the final technical gatekeeper before deployment.
- Integrated **Claude** / **AI** into the automation workflow to accelerate script development and complex debugging, improving development velocity and test accuracy.
- Worked in **Agile/Scrum** ceremonies – sprint planning, daily standups, and retrospectives – collaborating with developers and QA across every release cycle.

**International Rice Research Institute (IRRI)** *Jul 2024 – May 2025*
*Software Developer (Bioinformatics) & Thesis Affiliate* *Los Baños, Laguna*

- Re-architected IRRI's legacy Java monolith SNPseek genomics platform into a **MERN microservices system**: seven independent Node.js/Express services (auth, genomic, genetic feature, variety, phenotype, list, table) behind a single **API gateway**, orchestrated with **Docker Compose**.
- Re-engineered authentication and data access layers, building a custom **SSO/OAuth authentication layer** bridging legacy enterprise systems with the new Node.js microservices.
- Designed **MongoDB** schemas and REST/JSON endpoints for large-scale genomic datasets and built the **React** front end with multi-criteria filtering and interactive charts, optimizing query and render paths for speed and scale.

**Freelance / Project-Based** *Aug 2024 – Oct 2024*
*Full-Stack Developer* *Remote*

- Built a story-based interactive web game on the **MERN stack** with a 3-person team; owned front end, back end, and UI/UX through to client delivery.

## SELECTED PROJECTS

**Symphony – Cross-Platform Music Player** (Live) *2026*

- Built a minimalist music player for Windows, Android, macOS, and web from one **Flutter** codebase: playlist import from Spotify, YouTube, and Apple Music, on-device song resolution, offline downloads, synced lyrics, and a Discord bot.
- Engineered **Jam**, a listen-together mode over **WebSockets** on local Wi-Fi, kept in sync with clock-offset estimation and drift correction; releases automated with **GitHub Actions**.

**Codebreak 2.0 – RAG-Based AI Support Platform** (1st Place, Tenext.ai Hackathon) *May 2025*

- Built a full-stack AI platform for customer-support agents with a RAG assistant, automated live call scripts, and post-call QA analytics; owned REST APIs, microservices, deployment, and AI integration end-to-end, shipping a working MVP in under 24 hours.

**Sandalan – Filipino Adulting & Finance App** (Live on Google Play) *2024 – 2025*

- Solo-developed and shipped a finance product with 38+ bank integrations, tax calculators, OCR receipt scanning, and an AI chat assistant.
- Architected an **offline-first sync engine** with conflict resolution, incremental replication, and retry/failure recovery across 13 tables spanning **PostgreSQL** and SQLite, secured with row-level security and encryption.

**PICSEL – Reservation System** *Feb 2024 – Jun 2024*

- Built back-end components in a **20-developer team** over 5 months; integrated Google authentication and shipped across 7 features with peer code review.

**Additional – SOSC3, eLBigayan** *2023 – 2024*

- Further React/Flutter builds: a civic-tech advocacy platform and a Flutter donation platform backed by four Firebase services.

## EDUCATION

**University of the Philippines Los Baños** *2021 – 2025*
*Bachelor of Science, Computer Science* *Los Baños, Laguna*

- Graduated **Honor Roll**; Provincial Government of Laguna Scholarship Recipient. Coursework: Operating Systems, Computer Networks, Cybersecurity, Data Structures & Algorithms, Database Systems.

## LEADERSHIP & LANGUAGES

**UPLB Computer Science Society** *Oct 2023 – Jul 2025*
*Code Wars Co-Head & Project Manager* *Los Baños, Laguna*

- Led a 7-member development team on the competitive-programming event platform, overseeing feature development, bug tracking, testing, and deployment; ran the live platform for **20 teams, 3 judges, and 3 continuous hours of zero-downtime service**.

**Languages:** English (Professional/Fluent) | Filipino (Native)
