Jet Timothy V. Cerezo

Software Engineer | BS Computer Science, UP Los Baños

jetjetcerezo@gmail.com | +63 998 914 8907 | Los Baños, Laguna, Philippines

Portfolio | LinkedIn | GitHub

SUMMARY

Computer Science graduate from the University of the Philippines Los Baños (**Honor Roll**, multi-term scholar) who learns by building and shipping. **Solo-designed, built, and launched Sandalan**, a Filipino personal-finance app live on Google Play. Currently building digital solutions with FlutterFlow as Software Engineer at **Converge Studios Inc.**; previously engineered automated test coverage and CI/CD at consumer-fintech **Billease**, and interned at **IRRI**, re-architecting a genomics research platform into Node.js microservices. **1st place** at Tenext.ai's Codebreak 2.0 AI hackathon, delivering a RAG-based MVP in under 24 hours. Led a 7-member development team through UPLB CS Society's flagship event. Comfortable moving fast, learning in the open, and owning a problem end-to-end.

EDUCATION

University of the Philippines Los Baños *2021 – 2025*
Bachelor of Science, Computer Science *Los Baños, Laguna*

- Graduated **Honor Roll**. UPLB Department of Computer Science Academic Scholar (multiple terms); Provincial Government of Laguna Scholarship Recipient.
- Coursework: Data Structures & Algorithms, Database Systems, Operating Systems, Computer Networks, Cybersecurity, Software Engineering.
- Undergraduate thesis affiliate with the International Rice Research Institute (IRRI), working on genomic data tooling.

EXPERIENCE

Converge Studios Inc. *Sep 2026 – Present*
Software Engineer *Remote*

- Develop and deploy cross-platform applications leveraging **FlutterFlow** and **Flutter**, delivering scalable, cloud-first digital solutions for enterprise clients.
- Architect custom application logic, REST API integrations, and backend workflows to accelerate development cycles and product delivery.
- Collaborate across cross-functional engineering teams in **Agile/Scrum** sprints to build and maintain high-quality user-facing features.

Billease *Apr 2025 – Sep 2026*
Junior Test Automation Engineer *Remote*

- Consumer-fintech company serving the Philippine market at high scale; **shipped 150 merge requests and 45,000 lines of code** building automated test coverage and internal tooling.
- Engineered and maintained **CI/CD pipeline** integrations for the core regression and emergency-hotfix suites, validating every production release against high-priority test cases.
- Discovered and resolved **30+ critical, high-impact bugs** using Appium and BrowserStack, serving as the final technical gatekeeper before deployment.
- Integrated **Claude / AI** into the automation workflow to accelerate script development and complex debugging, improving development velocity and test accuracy.
- Worked in **Agile/Scrum** ceremonies – sprint planning, daily standups, and retrospectives – collaborating with developers and QA across every release cycle.

International Rice Research Institute (IRRI) *Jul 2024 – May 2025*
Software Developer Intern & Thesis Affiliate *Los Baños, Laguna*

- Re-architected IRRI's legacy Java monolith SNPseek genomics platform into a **microservices system**: seven independent Node.js/Express services behind a single API gateway, orchestrated with **Docker Compose**.
- Designed **MongoDB** schemas and REST/JSON endpoints over **large-scale genomic datasets**, and built the **React** front end with multi-criteria filtering and interactive charts; optimized query and render paths for speed and scale.
- Built a custom **SSO/OAuth** layer bridging legacy enterprise systems with the new Node.js microservices.

Freelance / Project-Based *Aug 2024 – Oct 2024*
Full-Stack Developer *Remote*

- Built a story-based interactive web game on the MERN stack with a 3-person team; owned front end, back end, and UI/UX through to client delivery.

SELECTED PROJECTS

Symphony – Cross-Platform Music Player (Live) *2026*

- Built a minimalist music player for Windows, Android, macOS, and web from one **Flutter** codebase: playlist import from Spotify, YouTube, and Apple Music, on-device song resolution, offline downloads, synced lyrics, and a Discord bot.
- Engineered **Jam**, a listen-together mode over **WebSockets** on local Wi-Fi, kept in sync with clock-offset estimation and drift correction; releases automated with **GitHub Actions**.

Sandalan – Filipino Personal-Finance App (self-initiated; live on Google Play) *2024 – Present*

- Conceived, designed, built, and shipped **entirely solo**: 38+ bank integrations, government tax and contribution calculators, OCR receipt scanning, and a Taglish AI chat assistant.
- Architected an **offline-first sync engine** with conflict resolution, incremental replication, and retry/failure recovery across 13 tables spanning **PostgreSQL** and SQLite, secured with row-level security and encryption.

Codebreak 2.0 – RAG-Based AI Support Platform (1st Place, Tenext.ai Hackathon) *May 2025*

- Built a **retrieval-augmented generation** assistant for customer-support agents that generated live call scripts from historical and in-progress tickets, plus automated post-call QA analytics.
- Owned REST APIs, microservices, deployment, and AI integration end-to-end, shipping a working MVP in **under 24 hours** against a competitive field.

PICSEL – Reservation System *Feb 2024 – Jun 2024*

- Built back-end components over 5 months within a **20-developer team**; integrated Google authentication and shipped across 7 features with peer code review.

Additional – SOSC3, eLBigayan *2023 – 2024*

- Further full-stack builds: a civic-tech advocacy platform and a Flutter donation platform backed by four Firebase services.

LEADERSHIP & ACTIVITIES

UPLB Computer Science Society *Oct 2023 – Jul 2025*
Code Wars Co-Head & Project Manager *Los Baños, Laguna*

- Led a **7-member development team** building and enhancing the platform for the org's flagship competitive-programming event, owning feature planning, bug tracking, testing, and deployment.
- Ran the live platform for **20 competing teams, 3 judges, and 3 continuous hours of zero-downtime service**.

eLBigayan – Flutter Donation Platform *May 2024 – Jun 2024*
Team Lead *Los Baños, Laguna*

- Led a 2-member team through the full development cycle, integrating four Firebase services for a secure, scalable backend.

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, Java, C/C++, SQL, Dart, PHP
AI & Data	RAG pipelines, Claude API, Gemini API, Hugging Face, Groq, Llama, OCR, large-scale dataset processing, SQL analytics
Back End	Node.js, Express, Nest.js, RESTful web services, JSON, microservices, API gateway, JWT / OAuth / SSO
Front End	FlutterFlow, React, Next.js, HTML5, CSS3, Tailwind CSS, Vite, responsive UI/UX
Databases	PostgreSQL, MySQL, MongoDB, SQLite, Supabase, schema design, query optimization
Mobile	Flutter, FlutterFlow, Dart, Riverpod, Drift, Capacitor, Google Play release
Practices	Docker, CI/CD, Git & GitHub, Agile/Scrum, code review, unit & end-to-end testing, Postman, Jira, Linux & Windows

Languages: English (Professional/Fluent) | Filipino (Native)
