WORK & ORGANIZATION EXPERIENCE

Junior Test Automation Engineer

04/2025 – Present

Billease

- **Shipped 50+ merge requests and authored 30k+ lines of code**, significantly expanding the automated test coverage and infrastructure for a high-scale Android application.
- **Engineered and managed the CI/CD pipeline integrations** for the core regression and emergency hotfix suites, ensuring every production release is validated against high-priority test cases.
- **Discovered and resolved 30+ critical, high-impact bugs** using Appium and BrowserStack, acting as the final technical gatekeeper before deployment to minimize production downtime.
- **Integrated Claude/AI into the automation workflow** to accelerate script development and complex debugging, drastically increasing development velocity and test accuracy.

Bioinformatics Software Developer Intern | Thesis Affiliate

07/2024 – 05/2025

International Rice Research Institute (IRRI)

- Implemented a custom OAuth authentication flow for SNPseek within a Dockerized Drupal environment, improving secure user access and system integration.
- Designed and developed a MERN-based SNPseek platform using a microservices architecture, applying full-stack development techniques to enhance scalability, usability, and data processing efficiency.

41st Computer Science Week Code Wars Co-Head/Project Manager

10/2023 – 07/2025

UPLB Computer Science Society (UPLB COSS)

- Led a 7-member development team in enhancing a competitive programming event platform, overseeing feature development, bug tracking, testing, and deployment for optimized system performance.
- Successfully deployed and managed the platform, supporting 20 participating teams, 3 judges, and 3 continuous hours of live service with zero downtime.

Full-stack Developer | Freelance | Project Based

08/2024 – 10/2024

2 Weeks

- Built a story-based interactive game with a 3 person team using the MERN stack, handled the frontend, backend, and UI UX development ensuring client satisfaction

EDUCATION

Bachelor of Science in Computer Science <i>University of the Philippines Los Baños</i> • Honor roll	09/2021 – 07/2025
STI College Calamba (STEM) • with honors	09/2019 – 06/2021

SCHOLARSHIPS & SKILLS

Scholarships Iskolar ng Laguna, UP SLAS	Skills Java, C, C++, Python, JavaScript, Dart/Flutter, SQL, PostgreSQL, Docker, Git, CI/CD, REST APIs, Node.js, React
---	---

PROJECTS & HACKATHONS

Sandalan - Adulting & Finance <i>Full Stack Developer</i> • Solo-developed and shipped a 15,000+ line Flutter mobile app on Google Play featuring 13 synced database tables, 38+ bank integrations, government tax/contribution calculators, OCR receipt scanning, AI chat, and Google Play Billing. • Architected an offline-first sync engine with conflict resolution, incremental replication, retry/failure recovery, and row-level security across PostgreSQL (Supabase) and local SQLite (Drift).	03/2026 – Present
Codebreak 2.0 Champion <i>(Full Stack Developer) - HACKATHON</i> • Developed a full-stack AI platform for customer support agents with a RAG-based assistant that generated live call scripts from past and current tickets, plus automated QA analytics after calls. • Handled APIs, microservices, deployment, and AI integration to deliver an MVP system within 24 hours securing the championship title against seasoned professionals while still a student.	05/2025
PICSEL <i>(Backend Developer)</i> • Successfully integrated Google authentication to enhance security and streamline the user login process. • Developed backend components for a reservation system with PostgreSQL, Express.js, Node.js, and React, contributing 9 commits and 12 merged pull requests to 7 features in a 20-developer team over 5 months.	02/2024 – 06/2024
eLBigayan <i>(Team Lead)</i> ▪ Led a team of 2 members in developing a donation system, overseeing the entire development process. ▪ Utilized Flutter and Dart and integrated 4 Firebase services to create a secure, and scalable backend.	05/2024 – 06/2024
